*Catherapy* [<https://github.com/sabrynahancock/Catherapy>]

A mental health app that connects patients and doctors. Doctors update their profile with availability, accepted insurances, and specialties. Patients track their mood and search for doctors by using filters such as distance, insurances, and specialties. The app makes it easier for patients to find the right mental care provider and helps doctors manage their practice effectively.

- Developed a web application using Python, Javascript(AJAX, JSON), HTML, CSS and SQL in a software agile environment
- Implemented Flask, Bootstrap, jinja, React frameworks and libraries
- Integrated Maps JavaScript API and Chart.js for location and data visualization
